

INDUSTRY AFFILIATE NETWORK (IAN)

IEEE standards provide stability, reliability and interoperability across a global stage. The mission of the Industry Affiliate Network (IAN) is to bring together consortia, industry alliances and other industry organizations looking to advance the standards development and adoption process that address technological innovations and advancements. IAN is a broad-based open and strategic framework to foster activities to achieve greater impact, accelerate path to standards development and achieve global visibility and spread to market adoption.

Why Join IAN?

Participation in IAN is open to all. Participant benefits include the opportunity to actively participate and steer the direction of the Industry Affiliate Network while. IAN offers:

- A framework for consortia, industry alliances and other industry organizations looking to advance the standards development and adoption process that address technological and market innovations.
- A proven framework to accelerate and facilitate a path from specification to globally accepted standard.
- Strategic value for industry organizations, alliances and consortia to achieve greater impact for global standards adoption.
- An opportunity to leverage IEEE brand, policy, process, and global distribution to create awareness and develop industry recognized and market-relevant standards.

How to Participate

The Industry Affiliate Network is open and inclusive to any consortia, industry alliance or other industry organizations looking to advance standards development and market adoption. All IAN participants:

- Share the values and principles of the Industry Alliance Network.
- Sign an agreement for IAN partnership status.
- Join IEEE SA as an Entity Member.
- Accept the IEEE SA Open Process and IPR Model.
